FormFill Cross Match Chart

The FormFill Cross Match Chart lists our product code numbers to various manufacturer's HPL Colors. Simply find the laminate number you are working with and you will quickly know the correct FormFill Caulk and Formfill Repairer number. This chart is updated once a year and we are constantly adding-NEW colors to the chart. We also have matches to a number of other products not listed in this chart. For matches to other products please call us toll free at 888-536-0042.

FormFill

CAULKING GUN

The FormFill Caulking Gun will change the way you apply caulk, saving you money, time on the job and eliminating the need for 10 oz. cartridges.

The unique controlled flow design (let up on the trigger and the flow stops) not only gives you unprecedented accuracy of application, but eliminates waste.

- Perfect bead with no more stops and starts, overfills and breaks.

The FormFill Caulking Gun allows you to caulk in those previously hard-to-get-to places, and continues to bead with accuracy down to the last drop in the tube.

The FormFill Caulking Gun. Lightweight, easy to use and fits most 5.5oz and 4oz tubes.

FormFill Color Matched Adhesive & Caulk has been specially developed for corner

and perimeter caulking with laminated counter tops, components, and fixtures. FormFill is also used as an adhesive in particle board counter top joints and has superior bonding qualities to other glues and caulking materials.

The colors in the FormFill range have been matched to Wilsonart, Formica, Pionite and Nevamar laminates as well as solid surfacing, melamine, and a variety of other products.

- FormFill Caulk is water resistant
- FormFill Caulk is fast-setting, flexible and mildew resistant
- FormFill Caulk is non-toxic
- Formfill Caulk cleans easily with water
- FormFill Caulk is currently available in a 5.5 oz. tube
- FormFill Caulk is available in any color with Same Day Shipping and No Minimum Order Quantities

FormFill Adhesive & Caulk Application Instructions

COUNTER TOP JOINTS

- 1) Knead tube before using.
- 2) Ensure the two surfaces of the joint are clean and dry.
- 3) Apply a thick bead of Adhesive & Caulk to one side of the joint and spread evenly with a putty knife.
- 4) Bring the two surfaces of the joint together and begin to tighten the draw bolts.
- 5) Align the joint and finish tightening the draw bolts.
- 6) Repeat step 3.
- 7) Some shrinkage might occur during final drying. If this occurs, reapply a light coat over the seam, allow a short drying period, and then wipe down with a damp cloth.

BACK SPLASH

- 1) Knead tube before using.
- 2) Place a bead of Adhesive & Caulk in the area to be sealed.

Note:

- 1) Protect from freezing.
- 2) FormFill Adhesive & Caulk will dry darker than when first applied.
- 3) FormFill Adhesive & Caulk is non-toxic, non-flammable, mildew resistant and cleans up with water.

FormFill

Laminate Repairer

For the first time, it is now possible to repair damaged surfaces,

chips and deep scratches in laminate counter tops, doors, flooring, melamine, wood surfaces and deck seam joints.

Each color has been specifically developed to match the leading laminate ranges, including Wilsonart, Formica, Nevamar, Pionite.

FormFill Laminate Repairer has been

scientifically formulated to resist moisture, detergent and other household products as effectively as the original laminate, and is now available in convenient .9 oz. tubes with No Mixing, No Minimum Order Quantities and Same Day Shipping.

FormFill Laminate Repairer Application Instructions

FormFill Laminate Repairer has been designed to bond (adhere) to the phenolic backer of HPL (high pressure laminate). The backer is either brown or black in color. It will also adhere to particleboard, medium density fiberboard, and plywood. FormFill Laminate Repairer is not designed to adhere to the surface of HPL.

1. Prepare the surface of the area to be repaired by exposing the phenolic backer or substrate. Thoroughly clean the area with FormFill Solvent (Acetone). It is important to use 100% acetone when working with the product.
2. Squeeze the Repairer onto the leading edge of a stainless steel flexible putty knife. Draw the repairer across the area to be repaired by flexing the putty knife. This action will force the Repairer down into the area to be repaired. Repeat this action several times until the repairer starts to harden.
3. Remove any excess Repairer from around the area being repaired with the leading edge of the putty knife. Wait approximately 15 minutes to allow the product to completely dry.
4. FormFill Laminate Repairer is a solvent based product and some shrinkage will occur. If the repairer has shrunk below the surface being repaired, simply repeat steps 2 & 3 until the repair is satisfactory.
5. Use a tissue or cloth with FormFill Solvent, and with light pressure, blend the repairer level with the surface.

* Product contains Toluene and is flammable by inhalation. Keep out of reach of children. Keep away from sources of ignition. Avoid contact with eyes.

* Manufacturer makes no warranty of any kind, expressed or implied, concerning the use of this product. Use see, meet all risks of handling or use whatever is appropriate with the directions or not.
